

sdmay23-33: Detecting convoys of molecular (and atomic) trajectories

Week 3 Report

October 7 - October 14

Team MembersJeremy Davis — *Developer*Daryl Kay — *Developer*Claira Springer — *Developer*Jason Guo — *Developer***Summary of Progress this Report**

We met with our advisor this week, before working on both the project plan and context documents. We also gave a lightning talk this week, getting good feedback from it. We looked at multiple options to decide which software to make our project with.

Pending Issues

The group still hasn't decided which software to use for our project. Finding times where all of us are available to meet has been difficult as well.

Plans for Upcoming Reporting Period

We plan to narrow in our decision to which software we want to use to build our project.

Individual Contributions

Team Member	Contribution	Weekly Hours	Total Hours
Jeremy Davis	Worked on much of the documents for the reporting period, including on the project plan and the context document.	8	
Daryl Kay	Worked to discover software for the team and worked on the documents for the reporting period.	8	
Claira Springer	Planned and created the presentation for the Lightning Talk from this week, answering questions at the end of the lightning talk. Wrote context document for the presentation.	8	0
Jason Guo	Helped work with the team on the context document and on the presentation.	8	0

Gitlab Activity Summary

Nothing to report.
