sdmay23-33: Detecting convoys of molecular (and atomic) trajectories
Week 6 Report
November 4 - November 11

Team Members
Jeremy — *individual component design*
Daryl — *Testing*
Claira — *Administration, client interaction, project management, documentation*
Jason — *Overall design*

Summary of Progress this Report
This week we just met with the client as usual and discusses this weeks section of the document regarding our plans to test our system to test if it meets the clients specifications accordingly. We also discussed meeting with our client another time to go into more detail on the system architecture and if they'd like any changes.

Pending Issues
No pending issues.

Plans for Upcoming Reporting Period
Next reporting period we plan to meet with the client again to discuss the architecture design and ask any questions that come up.
