

sdmay23-33: Detecting convoys of molecular (and atomic) trajectories

Week 8 Report

November 25 - December 2

Team MembersJeremy — *individual component design*Daryl — *Testing*Claira — *Administration, client interaction, project management, documentation*Jason — *Overall design***Summary of Progress this Report**

This period we finalized the design document and verified everything we had meet the requirements of the client, met the rubric requirement through the template and meet with our advisor and client to see if they had any ideas on how to convey some information such as the chemistry topics. We also discussed a little bit about the presentation section to see if they had any pointers or specific information to share.

Pending Issues

No pending issues.

Plans for Upcoming Reporting Period

N/A
